ABOUT ME!

Data analytics engineer from Italy living in Berlin who loves to organize and play with data while discovering the latest technologies available in the market.

I've been working for the past 6 years in the data world as a business intelligence developer first and lately as a data engineer. During my experiences i worked within awesome teams, mentoring and being mentored, while learning how to build scalable and efficient data solutions always paying focus on the business processes and operational optimization.

Bridging the gap between business and tech is my strength

EXPERIENCE

2020- HELLOFRESH SE

NOW SCM DATA ENGINEER - Berlin, DE

Following the Data Mesh organizational structure i have the responsibility to design, implement and maintain the platform and the code for all the operational data pipelines
